Product Recommendations

Dental Floss: www.buypoh.com

Dr. Harding and his hygienists highly recommend this dental floss because in their observations it appears most effective at removing plaque from the tooth surface. It does not have a waxed coating and allows for friction creating the “squeaky clean” noise and feeling when used in a proper “C” shape motion.

Accessories:

For other products recommended by Dr. Harding and his hygienists visit www.jbutler.com or see list below of accessories that may have been dispensed to you at your hygiene appointment.

Softpicks

Rubber Tip Stimulator

Interdental Brushes/Proxybrushes

UltraSoft Toothbrush

Mouth Rinses:

www.actfluoride.com

www.crestprohealth.com

Toothpastes: □

We are not partial to any one over the counter toothpaste. We encourage all our patients to use one that has a pleasing flavor and contains fluoride.

If indicated Dr. Harding may recommend or prescribe toothpaste to treat such conditions such as sensitivity or to aid the in prevention of tooth decay.
